6. GrandChase

7. etc.

3 About the project

A web-based game store is an online platform that allows users to browse, purchase, and download digital games directly from their web browsers. These stores provide a convenient and accessible way for gamers to explore a wide range of titles, spanning various genres and platforms. Users can often create accounts to track their game libraries, manage purchases, and receive updates on new releases. Additionally, web-based game stores frequently incorporate user reviews and ratings, aiding potential buyers in making informed decisions. With the growing popularity of digital distribution, these platforms have become integral to the gaming industry, offering a seamless and efficient way for players to discover, acquire, and enjoy their favorite games without the need for physical media.

4 Langauge used in project

1. HTML

2. CSS
